

## Project Summary Report for 0 KW Rooftop Solar PV System at , ,

## Introduction of AHA! App

AHA Solar Rooftop Helper App (AHA!) and the Website offers solar power estimation with approximate cost, applicable government incentives, finances, and information about your nearby Solar PV Rooftop Installers (the “Installer”). The app is available on various platforms like Android, iOS and Windows across several cities in India and also provides project management tool for Installers to carry out feasibility studies, site surveys, design and preparation of techno-commercial proposals for their customers. We offer a common platform for end consumers and Solar PV Installers to become a part of the solar revolution.

## About Company & Team

At AHA! we are a team of dedicated professionals passionate about bringing a revolution in the solar energy sector of India. With entrepreneurial talent from diverse technical and management backgrounds, we bring diverse expertise encompassing all aspects of Solar PV industry. Our salient skills are tech know how, market analysis and understanding along with suggestions for financing projects in the Indian scenario.

AHA! tracks the Solar PV market on real-time basis with its extensive and active network thus connecting you to industry experts, government officials and policy makers. AHA! is knowledge-driven, analytical in approach and believes in output-oriented approach in all processes. This reflects in the tools we use for calculating solar capacity on rooftop, building bridges between installers and end customers.

Lastly, along with providing project management and strategic planning services we also strive to provide a transparent and reliable service.

Further, we intend to provide complete solar solutions platform to residential, commercial and industrial establishments. We emphasize on customized solutions in the Indian solar rooftop space as the solution for reducing power costs along with the benefit of promoting clean energy.

## Input by the User

---

### Input by Jakes Sparow

Type of Customer

Residential

Average Energy Consumption

3 kWh

Average Monthly Bill

Rs.22 per month

Type of Back-up power used

No

Back-up Usage (if applicable)

N/A

## Assumptions

---

### Performance Parameter

Operation and Maintenance Cost

0.75% of Asset Value

Operation and Maintenance Cost

5.72% annually

Annual Performance Deration

1% per year

---

### Financial Parameter

Debt

70%

Insurance Cost

0.35% of Project Cost

Depreciation

First 10 years– 6%

Next 15 years – 2%

Accelerated Depreciation\* (if applicable)

40%

Corporate Tax (if applicable)

34.64%

\* Note:

1. Accelerated Depreciation is applicable for the solar PV systems for Industrial and Commercial segments.
2. 30% Capital Subsidy is applicable for the Solar PV System for Residential, Social Sector and non-profit making institution.

# Average Yearly Radiation For ,<sup>1</sup>

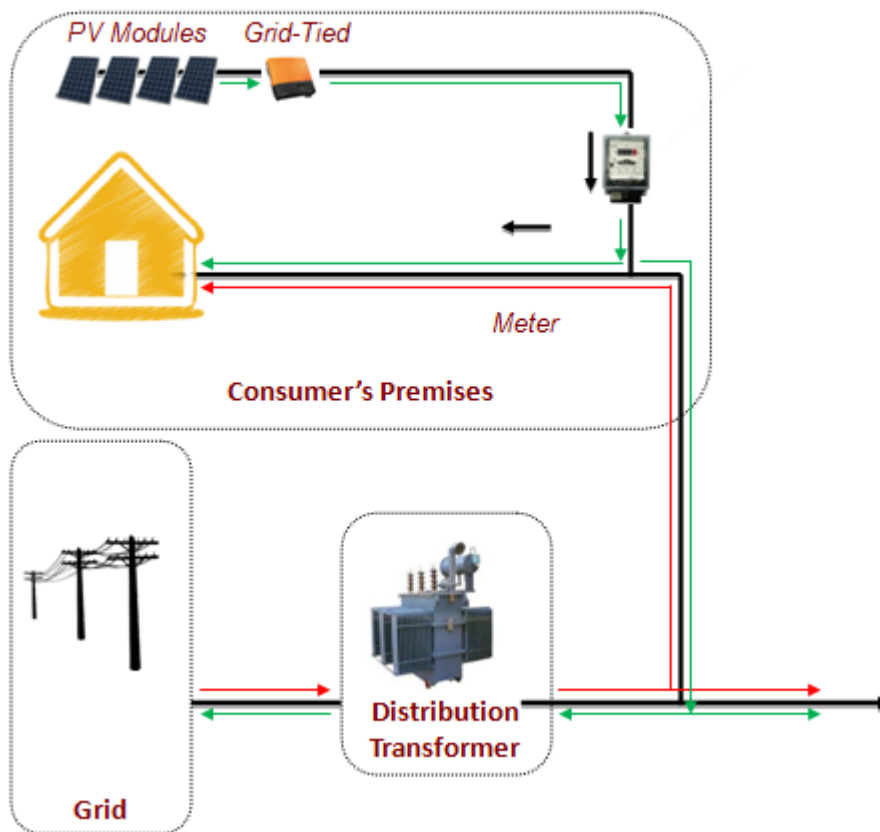

## Results

Sr.	Particulars	Units	Recommended by AHA!
A.	Recommended Capacity	kW	0
B.	Estimated Cost	Rs. in Lacs	
C.	Subsidy	Rs. in Lacs	0
E.	Payback	Years	0
F.	Savings	Rs./month	1.50
G.	Savings	Rs./Yr	18.00

## System specification

- a. Solar PV Module Capacity: 0 watt
  - b. Inverter Capacity : 0 kW
  - c. Default Angle: 24
- 

## Typical Grid-Connected I Solar PV System

Sr.	Month	Energy Generated (kWh)	Saving (Rs)
1.	January	0	1.50
2.	February	0	1.50
3.	March	0	1.50
4.	April	0	1.50
5.	May	0	1.50
6.	June	0	1.50
7.	July	0	1.50
8.	August	0	1.50
9.	September	0	1.50
10.	October	0	1.50
11.	November	0	1.50
12.	December	0	1.50
	Annual	0	18.00

## Summary

The recommended rooftop solar PV system (RSPVS) as per your requirement is 0 kW. The capacity is determined considering your electricity usage, relevant policy and regulations of your State Government, Government of India and the inputs given by you.

An approximate cost of the RSPVS will be around Rs. 0 /- with a payback of 0 years considering subsidy.

If you are a profit making Company then you can also avail tax benefit of 40% Accelerated Depreciation for your RSPVS. This is applicable only for Industrial or Commercial User.

## Finally, Important

As you are seriously considering owning a rooftop solar PV system, please keep these facts in mind:

- A PV system should last you at least 25 years! Hence, quality is very important. Cheapest is not always the best!
- Warranties you should have on your rooftop PV system:
  - 25 year performance warranty on PV modules, which states that the performance of the PV module will not be less than 90% of its rated value for the first 10 years, and not less than 80 % for the next 15 years.
  - 5 year workmanship warranty on PV modules.
  - 5 year warranty on inverters.
  - 5 year warranty on overall rooftop PV system.
- You should take an undertaking from your PV system Installer that all components as well as the entire PV system itself adheres to all relevant IEC and Indian Standards.
- Your PV system Installer should help you obtain the necessary clearances (from the Distribution Company, Electrical Inspector, etc.) as well as subsidies, if applicable.
- We highly recommend you to give an at least 5-year comprehensive maintenance contract (CMC) to your PV system installer.
- And finally remember...

## You are not alone!
